

Reconstructed-IPD meta-analysis (two-stage, DL + Hartung-Knapp) – pelvic vs prostate-only RT

Hazard ratio (95% CI), log scale. Two-stage random-effects meta-analysis (DerSimonian-Laird τ^2 + Hartung-Knapp CI) of Guyot-reconstructed pseudo-IPD. Squares = trials, diamond = pooled. Arrowhead = CI beyond axis. HR<1 favours pelvic RT (WPRT).
